-Status
The MainMenuFrame class and the GuiPetStoreSystem class are to be invoked for
the program to run.

-Adding the staffmember widget window works fine but the texfield for inputting the
information for the employee sin&id is a little bit slim than other textfield but workes fine
with all information displayed

-it took about a week getting the whole program/application to work correctly

- Classes Added to the GUI package
*StaffMemberAddFrame
*StaffMemberAddPanel
*StaffMemberFrame
*StaffMemberOpsFrame
*StaffMemberOpsPanel
*StaffMemberAcessPanel
*StaffMemberPanel
*MainMenuFrame
*MainMenuPanel

- And also on the startup package for the GUIPetStoreSystem
* added the MainMenuFrame to the GuiPetStoreSystem to startup the application
